Cable hoist

Code	CT116.3
GTIN	6418677412158
ENumber	
Name	Cable hoist
	Single 500 kg / Double 1000 kg
Description	CT116.3 is a ratchet puller for line tensioning.

Technical specification

Dimensions

Weight:	6.39 kg
Rope diameter:	4.76

Mechanical

Capacity, single/double wire:	500/1000 kg
Pulling length, single/double wire:	4.6/2.3 m

Ratings

ETIM class:	EC002205
--------------------	----------

Specification

Use:	Two-capacity design allows for four-way rigging. Top hooks and sheave block hooks rotate 360 degrees. Winding wheel for tightening slack cable included on all models. Double interlocking pawl system holds securely regardless of the direction of pull. Rope drum and ratchet integrally cast for positive action.
-------------	---

Construction:

Reversible tubular aluminium handle for convenient operation. Designed to bend to warn of hazardous condition and prevent dangerous overload. High-strength aluminium alloy castings reduce weight and resist corrosion. Aluminium bronze cable guide and spring steel retaining shield help wind cable properly onto drum. All load bearing shafts are stainless steel to resist corrosion. Wire rope is pre-formed 7x19 aircraft cable. Hooks are drop-forged with latches.
